

THE HANDYMAN PORTFOLIO

We install, repair, and stain decks, and fences too.

Additional rough carpentry includes repairs to doors and other wooden objects.

We'll do general repairs, such as installing new fixtures and light switches, but won't run new wires, and create shelves and storage in garages.

And we refinish antiques.

In most situations, we provide a not-to-exceed estimate, and we always leave things clean and tidy.

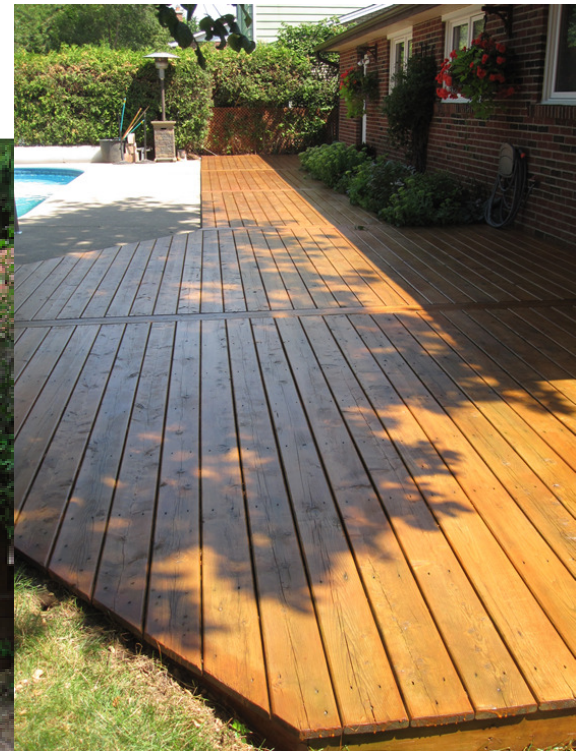

DECKS SLIDE 1

We install, repair, and stain decks. Here, we repaired supports and the deck face; built a new seat; and stained all.

DECKS SLIDE 2

Here, we replaced rotted supports and non-code railings, then stained everything. On the right is an 8-year-old cedar deck revitalized with a new coat of stain.

FENCES 1

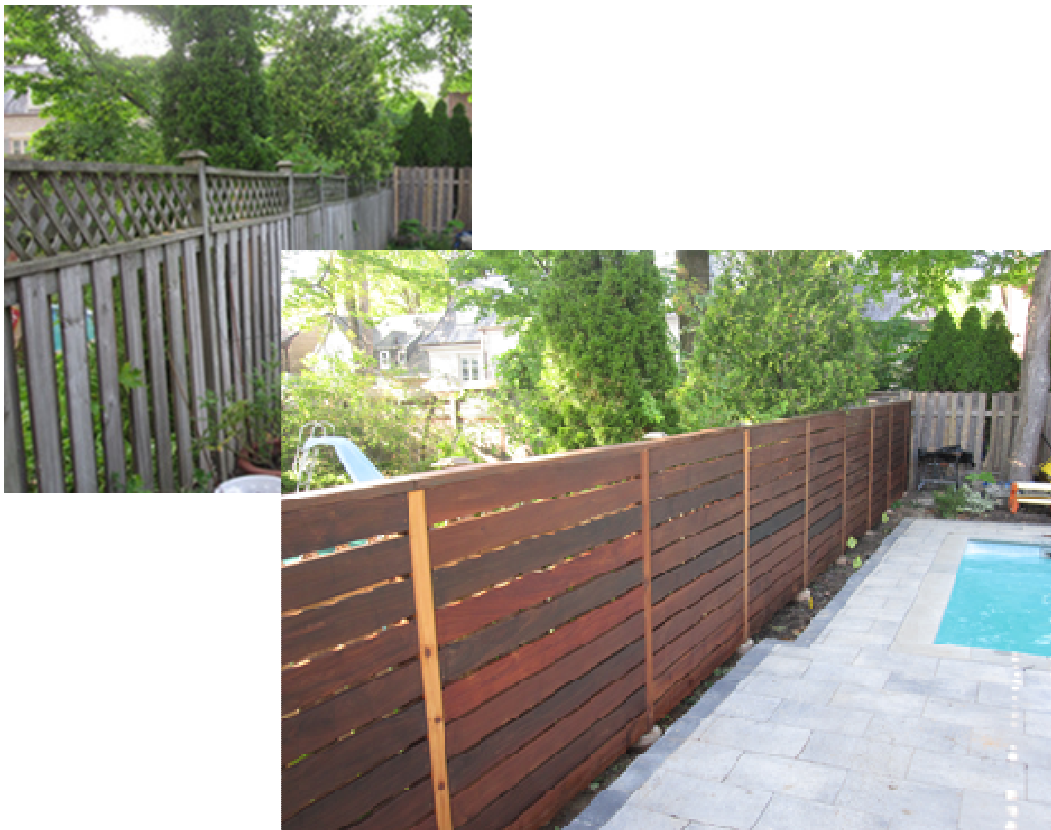

We repair and install fences too, sized to fit the location, in both PT and cedar, working around trees and building doors on-site.

FENCES 2

While we normally use local materials, this yard with a new pool was done in cedar posts and Ipe, a Brazilian walnut.

Before and after.

The other side.

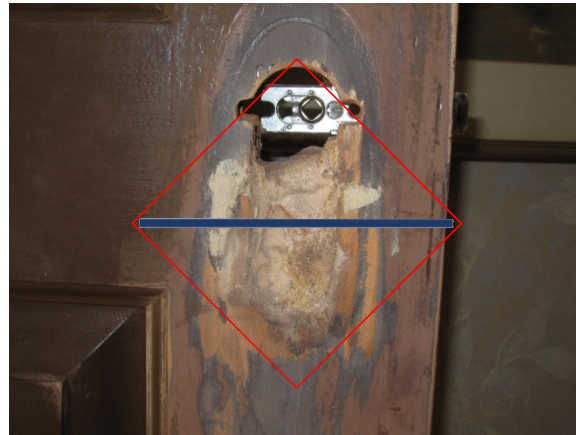

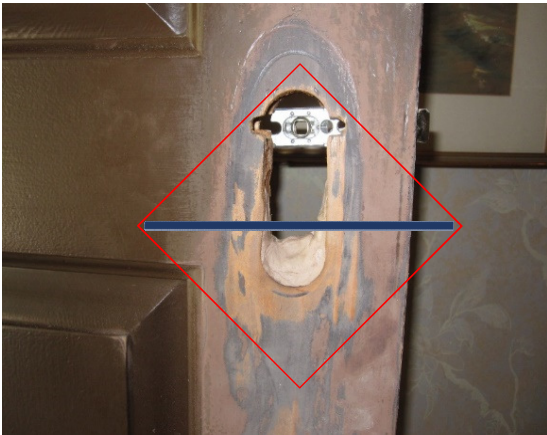

NEED SOME WOODWORK?

We replaced rotted sills, framing, and screens in this 50-year old patio, then painted it inside and out.

WOODWORK 2

This treasure - a 50-year-old, 50-inch wide, solid wood door – had been subjected to 3 hand-sets. We built up the missing wood with dowels and epoxy, as shown by the blue lines, and installed a new hand-set, saving the expense of a new, custom-built door.

GENERAL REPAIRS

We can install a dimmer-switch, swap out a 60-year old rusted electrical box and fixture, and create needed storage or workspace in the garage.

ANTIQUES

We strip and restore antiques, such as this abused dry sink.
