

## ***THE PAINTING PORTFOLIO***

There is more to just slapping on a coat of paint.

We can help with colour selection, ensure smooth edges, get to those hard-to-reach places, and address interior or exterior damage.

In most situations, we provide a not-to-exceed estimate, and we always leave things clean and tidy.

**INTERIOR** We can help you choose colours, picking complementary tones, and of course we reach those difficult places.

## PAINTING

Here, the homeowner chose a quiet colour to help their antiques – the settee, sconces, organ, and clock - take centre stage.

**INTERIOR** This home had a dark foyer and a light-colour hallway and second floor landing that did not complement the richness of the wooden stairs and floor. Both areas were tied together with a light brown.

## INTERIOR

### DAMAGED DRYWALL?

### PATCHED AND PAINTED

## EXTERIOR

We'll sand it down and spruce it up, and we'll replace the waterproofing around features like bay windows.

## EXTERIOR

Years of wear, and ball hockey, can be repaired and erased.

## EXTERIOR

This one combines a bit of handyman services and painting, where we replaced rotted sills, framing, and screens in this 50-year old patio, then painted it inside and out.
